

One-Day International Energy Efficiency Financing Protocol (IEEFP) Workshop

EVO Vision

A global marketplace that correctly values the efficient use of natural resources and utilizes end-use efficiency options as a viable alternative to supply options

EVO Mission

To develop and promote the use of standardized protocols, methods and tools to quantify and manage the performance risks and benefits associated with end-use energy-efficiency, renewable-energy, and water-efficiency business transactions

Board of Directors

Chair: Satish Kumar, India

Vice Chair: Tom Dreessen, USA

Treasurer: Steve Kromer, USA

Secretary: Anees Iqbal, UK

Past Chair: John Cowan,
Canada

Board members

Timothy Hui, China

Jin Ruidong, China

Patrick Jullian, France

Pierre Langlois, Canada

Tienan Li, China

Next training: Brussels, November 27, 2012.

Go to <http://www.evo-world.org> to register for this training.

Overview

The Efficiency Valuation Organization is an international non-profit organization that offers products and services which aid in:

- The measurement and verification of energy and water savings resulting from energy/water efficiency projects
- Financial risk management of energy savings performance contracts
- Quantifying carbon emissions reductions from energy efficiency projects
- Promoting sustainable and green construction through cost-effective and accurate accounting of energy and water savings

This IEEFP training material was developed by an IEEFP expert working group, based on its experience and on the IEEFP published by Efficiency Valuation Organization (EVO®). EVO makes no representations or warranties, express or implied, as to the content of the training materials except where its IEEFP is explicitly referenced.

Protocol

EVO has developed an IEEFP which provides guidelines for Local Financing Institutions (LFIs) around the world to evaluate and finance energy efficiency and savings-based renewable projects (Energy Savings Projects).

The IEEFP's objective is to create a better understanding by LFIs and other global stakeholders on how Energy Savings Projects generate savings from existing operating expenses of end-use consumers, and how this equates to new cash flow and increased credit capacity for end-use consumers to repay EEP loans.

At the core of the IEEFP is the need to measure and verify energy savings created by the Energy Savings Projects to ensure sustainability of the reduced energy costs and the resulting available cash flow to repay the LFIs.

The following topics will be covered:

- Global EE/RE Concepts Overview
- EE Stakeholders (Roles/Benefits/Concerns)
- EE Technologies
- Global EE Financing Structures
- EE Financing Barriers and Solutions
- ESCO Business Model
- Investment Grade Audit (IGA)
- Savings Measurement & Verification
- EE Transaction Elements & Risk Mitigation
- EE Project Case Studies

While exceptionally professional in its activities, EVO is at heart a grassroots organization. As such, its energy, resources and direction stem from the contributions of those that make up its community. We sincerely hope you will become part of it. Find out more about the organization and becoming a Volunteer, or an Individual or Organizational Subscriber at
